## FSM-IMX675

a Sony® IMX675AAQR Sensor Module

### General Description:

This FRAMOS Sensor Module (FSM) provides the Sony IMX675 sensor on a very compact module. The Rolling Shutter sensor has a native resolution of 5 [MP] and an optical format of 1/2.8 inch at a pixel size of 2 x 2  $\mu\text{m}$ . The Module has a MIPI CSI-2 interface with up to 4-data lanes.

FRAMOS Sensor Modules enable users to seamlessly plug the latest image sensor technology into common processing platforms. These modules feature a fully modular design that utilizes standardized connectors and mechanicals. The modules include image sensors on a PCB and have resolutions from 0.4 MP to 24 MP with both rolling and global shutter options. FRAMOS Sensor Modules are ideal in evaluating a sensor as part of a proof-of-concept design. The modules also can compare and contrast multiple sensors using a common backend and integrate them into third-party processor boards.

### Targeted Use:

Applications for industry, security and surveillance, and consumer cameras.
